EDUCATION

Bachelor of Technology, Information Technology
Kakatiya University, Warangal

2021 – 2025
CGPA: 8.22

TECHNICAL SKILLS

- **BI & Visualization:** Power BI, DAX (Data Analysis Expressions), M Language, Power Query, Data Modeling, Interactive Dashboards
- **Database & ETL:** SQL Server, MySQL, SQL Queries, CTEs, Window Functions, Joins, ETL Pipelines, Data Warehousing, Star Schema
- **Data Analysis:** Python (Pandas, NumPy, Matplotlib), Advanced Excel, Pivot Tables, VLOOKUP/XLOOKUP, EDA, KPI Reporting
- **Statistics:** Descriptive Statistics, Correlation, Trend Analysis, Business Intelligence
- **Tools & Other:** GitHub, Data Cleaning, Report Automation, Stakeholder Communication, Analytical Thinking

EXPERIENCE

Power BI & SQL Developer Intern

Jul 2025 – Aug 2025

Besant Technologies — Remote | Tools: Power BI, DAX, M Language, SQL Server

- Designed and deployed interactive Power BI dashboards using DAX measures and M language transformations, boosting reporting efficiency by 30% and enabling real-time KPI tracking for business stakeholders.
- Implemented ETL pipeline workflows using Power Query to extract, transform, and load data from multiple structured sources, ensuring data accuracy and consistency improvements of 30%.
- Optimized Power BI report performance through efficient data modeling, reducing query load times and improving end-user experience across stakeholder-facing dashboards.
- Automated KPI reporting workflows that eliminated repetitive manual processes, reducing reporting turnaround time by 25% and freeing analysts for higher-value tasks.
- Conducted exploratory data analysis (EDA) using SQL and Power BI to surface trends and anomalies, delivering actionable insights used by management for performance tracking.

PROJECTS

Hospital Management Analysis Dashboard | Power BI, DAX, Power Query

Jan 2026 – Feb 2026

- Developed a fully interactive Power BI dashboard analyzing patient volume, billing trends, appointment fees, and satisfaction scores across departments, improving reporting visibility for clinical stakeholders.
- Engineered DAX measures for dynamic KPI cards (revenue, patient flow, satisfaction rates) and implemented M language transformations in Power Query for data cleaning and schema normalization.
- Integrated slicers for Doctor, Department, and Date Range filters, enabling deep drill-down analysis and reducing time-to-insight by providing self-service reporting capabilities.

SQL Data Warehouse Project | SQL Server, ETL, Star Schema

Jan 2026 – Feb 2026

- Architected a data warehouse using Star Schema design with optimized fact and dimension tables, applying data warehousing best practices to support scalable BI reporting.
- Built an end-to-end ETL pipeline in SQL Server using CTEs and Window Functions to transform, validate, and load data, with full documentation published to GitHub for reproducibility.
- Developed business reporting queries that aggregated multi-source data into executive-ready summaries, demonstrating proficiency in SQL data extraction and transformation.

Sales Performance Analysis Dashboard | Power BI, DAX, Power Query

Sep 2025 – Oct 2025

- Designed a comprehensive Power BI sales dashboard with DAX measures for total revenue, profit margin, YoY growth, and top-product rankings, enabling data-driven sales strategy decisions.
- Cleaned and restructured raw sales data via Power Query and built a normalized data model, ensuring report accuracy across region-wise performance and customer segment visuals.

CERTIFICATIONS

- Data Visualization with Power BI — Tata Group (Forage)

- Microsoft Power BI Certification — SkillCourse
